Introduction

Quest Meals exists to make eating well feel simple. This guide sets out how our brand looks, sounds, and behaves, so every touchpoint, from a lid label to a website, feels unmistakably ours.

Use it as your go-to reference whether you design for, market, partner with, or speak on behalf of Quest, and help us build recognition that grows with the company.

Logo

Logo

Our logo is the most recognizable piece of the Quest identity. The ring-and-leaf Q signals fresh food and steady progress, and it appears wherever people meet us: packaging, screens, uniforms, and events. Treat it with care, follow the rules in this guide, and it will keep working hard for the brand.

*Our primary vertical logo lockup

*Our official brandmark

*Our secondary horizontal logo

Logo clearspace

Give the logo room to breathe. A protected margin keeps it sharp, legible, and free from competing elements such as other logos, slogans, or the edges of a layout.

The margin is measured in units of 1x, which equals the height and width of the Q brandmark. Always leave at least 1x on every side. Photos, patterns, and text should stay outside this zone.

The rule applies to both the vertical and horizontal versions. Respecting it keeps Quest looking confident and consistent wherever it appears.

Logo don’ts

Our logo only works when it stays intact. Altering it weakens recognition and the trust we build with every meal.

Avoid the changes shown here. The same rules cover the horizontal logo and the brandmark.

DO NOT apply shadows or effects.

DO NOT distort the proportion of our logo.

DO NOT use diffrent colors for our logo.

DO NOT use different fonts for our logo.

DO NOT use the full-color logo over a busy background.

DO NOT rearrange or rescale its elements.

Logo color variation

Quest's signature look pairs Fresh Lime with Deep Forest, and this full-color logo is the first choice wherever it remains legible.

When the background or print method calls for something different, use the alternate versions provided: white, black, or lime-on-green for dark surfaces, plus single-color options for stamps, embossing, and one-color print.

Color

Primary color palette

Quest's core colors are drawn straight from the logo. Deep Forest anchors everything with depth and credibility. Fresh Lime brings the energy, a nod to leaves, produce, and momentum. Morning Mist keeps layouts light, airy, and easy on the eye. Together, they give Quest a clean, vibrant personality in every format.

Color Role	Purpose
PRIMARY	Logo, headings, key text
PRIMARY ACCENT	Highlights and calls to action
PRIMARY LIGHT	Main backgrounds and clean layouts

PRIMARY

Deep Forest

HEX Code #11301A
RGB 17, 48, 26
CMYK 65, 0, 46, 81

PRIMARY ACCENT

Fresh Lime

HEX Code #8BC53F
RGB 139, 197, 63
CMYK 29, 0, 68, 23

PRIMARY LIGHT

Morning Mist

HEX Code #F3F9EB
RGB 243, 249, 235
CMYK 2, 0, 6, 2

Supporting color palette

Supporting colors add range without stealing focus. Oat and Charcoal give us calm, grounded neutrals for backgrounds and text. Sage adds a soft, herbal note for interface details, while Tangerine injects a burst of appetite and energy for promotions and callouts. Use them in small doses to keep the primary palette in front.

Color Role	Purpose
NEUTRAL BASE	Secondary backgrounds and large areas
BODY TEXT	Body copy and long-form text
SYSTEM ACCENT	Secondary accents and UI elements
SECONDARY ACCENT	Promos and special callouts

NEUTRAL BASE

Oat

HEX Code #E4DFD0
RGB 228, 223, 208
CMYK 0, 2, 9, 11

BODY TEXT

Charcoal

HEX Code #2E3830
RGB 46, 56, 48
CMYK 18, 0, 14, 78

SYSTEM ACCENT

Sage

HEX Code #7F9473
RGB 127, 148, 115
CMYK 14, 0, 22, 42

SECONDARY ACCENT

Tangerine

HEX Code #F28C28
RGB 242, 140, 40
CMYK 0, 42, 83, 5

Typography

Typeface

One typeface keeps Quest simple and consistent. We use Inter across everything, from packaging labels to presentations to our website, because it stays crisp and readable at any size.

Semi Bold gives headlines presence and authority. Regular carries body copy, captions, and everyday information. Light is saved for large display text only. By varying weight and size rather than fonts, we create clear hierarchy without clutter. Inter's tabular numerals also keep nutrition figures neatly aligned.

Pattern

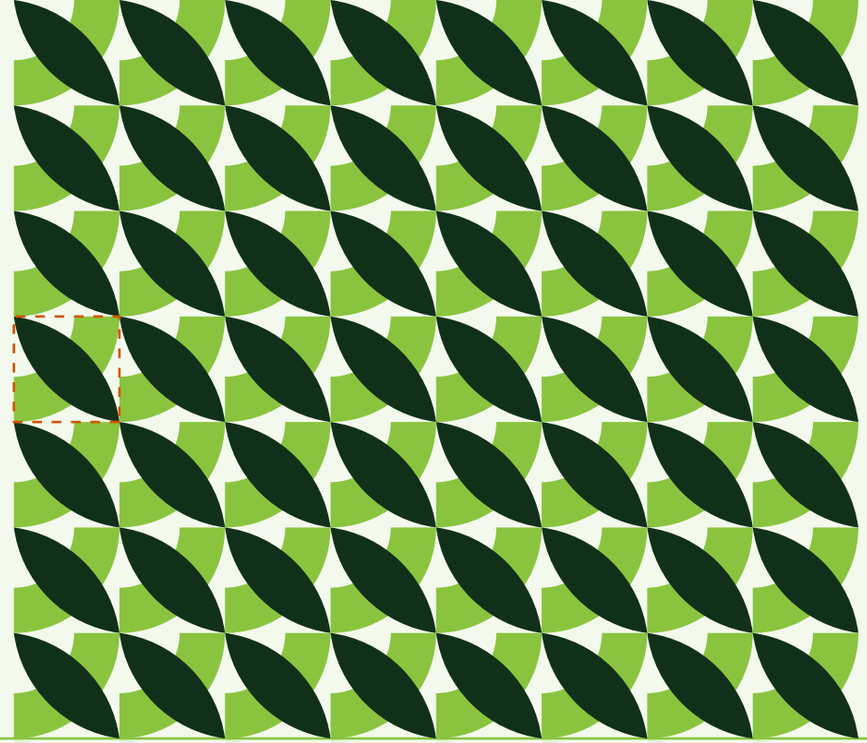

Brand pattern

Leaf Weave is Quest's signature pattern. It takes the leaf and ring from our logo and repeats them into a rhythmic, interlocking design that feels organic yet orderly, like rows in a well-kept garden.

Use it as a supporting element, never as a replacement for the logo. It suits packaging, containers, sleeves, printed materials, and digital backgrounds, adding personality and freshness while keeping everything unmistakably Quest.

Choose Sprout Field for quiet, tonal moments and Leaf Orchard when you want more contrast.

Brand Governance

A strong brand stays strong through consistency. Everyone who represents Quest, whether in-house teams, agencies, or partners, is responsible for applying these guidelines across digital, print, and physical touchpoints.

If you need to adapt, extend, or step outside the system, check with the Marketing team first. Approval keeps the work aligned with Quest's values, quality, and long-term direction.
